PROJECTS

KRN CODE (Web Code Editor) 🔗

- I developed a robust web code editor using React.js,Nodejs,MongoDB,ExpressJS, Monaco Editor, EditorReact, Framer Motion, Chakra UI, React DOM, and more. This editor supports six languages: JavaScript, TypeScript, Python, Java, PHP, and C#, catering to diverse programming needs with enhanced usability and performance

Blog Application 🔗

- Building this blog app was a deeply rewarding experience. Using Node.js, Express.js, Passport.js for authentication, and MongoDB, I crafted a platform for sharing and connecting. The project involved integrating hbs and ejs for dynamic content, creating a seamless user experience with secure login and content management. It reflects my passion for developing meaningful, usercentric web applications]

Chat Application real Time 🔗

- Using Express.js, Node.js, Socket.io, CSS, EJS, and JavaScript, I created a real-time chat app. It enables instant communication with web sockets, emphasizing responsive design and intuitive user interactions, showcasing my commitment to dynamic web applications

Recipes App 🔗

- I built a recipe app with React.js, featuring CRUD operations. This project allowed for seamless creation, reading, updating, and deleting of recipes, highlighting my proficiency in React.js development.
